

JAVEA INTERNATIONAL RESEARCH CENTER  
**INSTITUTE FOR COOPERATION AND DEVELOPMENT**

*JIRC - INSTITUTE FOR COOPERATION AND DEVELOPMENT*

## JAVEA INTERNATIONAL RESEARCH CENTER

Is a private research organization that has the institutional agreements and material and human resources, necessary to carry out its activities aimed at generating research knowledge and its exploitation in companies already operatives or enabling the generation of new business initiatives aimed at improving the competitiveness of companies and their contribution to economic and social development. This Research Center has an industrial platform "Holding", prepared to develop the industrial production lines making the connection between

### "Knowledge - Industry - Production – Trade - Social and human development"

#### 1.- OBJECTIVES

1. - Promoting social responsibility and sustainable development in businesses, with a humanistic approach and international scope.
2. - Helping companies to understand and manage the impact of globalization, and to develop strategies of internationalization.
3. - Encouraging research that brings new insights to firms enabling them to extract more commercial and strategic value from their innovation efforts.
4. - Fostering cooperation between the private sector and public administrations, as well as the exchange of ideas and initiatives through dialogue, research and education.

These principles and objectives are developed through the JIRC **Institute for International Cooperation & Development**, it works to promote human development and international cooperation by providing research and analysis, information resources and documentation, postgraduate studies and other university courses in the fields of development and cooperation by generating skills to strengthen the social fabric of cooperation by providing technical advisory services to a range of public bodies and institutions and by drawing up cooperation projects and programs.

The staff of JIRC ICD see education as a way of fostering critical awareness in society and providing tools for politically committed action. We see education initially as a concept that includes a political dimension in its goals and strategic proposals for social change.

## **2.- ADMINISTRATIVE DATA**

CIF: B53621264

ADDRESS: AVENIDA DEL PUERTO, 24, BLOQUE 1, 03730, JAVEA (ALICANTE)

## **3.- CENTER OF RESEARCH AND DOCUMENTATION**
